

## Modeling and Simulation Terms (Concepts)

© and maintained by Dr. Tuncer Ören

Updated 2006-11-05

A--

absorb (v)

absorbed

absorbing

abstract

abstract (v)

abstracting

abstraction

abstraction, behavior

abstraction, behavioral

abstraction, high-level

abstraction, level of

abstraction, model

abstraction, process

acausal

accept (v)

acceptability

acceptability, criterion for

acceptability, data

acceptability, model

acceptability, parameter

acceptability, program

acceptability, standard for

acceptable

acceptance, user

accepted

accepting

acceptor

access

access, multiple

accessibility

accessibility, data

accessible  
accessible, web  
accreditate (v)  
accredited  
accreditation  
accreditation, application-specific  
accreditation, general  
accreditation, M&S  
accreditation, model  
accreditation, validation, verification, and  
accuracy  
accuracy rating  
accuracy, approximation  
accuracy, content  
accuracy, control  
accuracy, data  
accuracy, global relative  
accuracy, integration  
accuracy, level of  
accuracy, local  
accuracy, local relative  
accuracy, measurement  
accuracy, model  
accuracy, range of model  
accuracy, simulation  
accuracy, time-base  
accurate  
accurate, fourth-order  
acquisition  
acquisition, cost analysis for simulation-based  
acquisition, data  
acquisition, knowledge  
acquisition, research development and  
acquisition, simulation for  
acquisition, simulation-based  
acquisition, simulation-based system  
acquisition, synthetic environment-based  
action  
action, event-condition-  
activate (v)  
activation

activation, model  
activation, submodel  
active  
activity  
activity, computational  
activity, continuous  
activity, external  
activity, goal-directed  
activity, internal  
activity, knowledge generation  
activity, knowledge processing  
activity, model-based  
activity, modeling  
activity, post run  
activity, post study  
activity, pre run  
activity, pre study  
activity, runtime  
activity, scan  
activity, scheduled  
activity, systemic  
activity, time-consuming  
actor  
actuator  
adaptation  
adaptation, alloplastic  
adaptation, autoplasic  
adaptation, continuous  
adaptation, dynamic  
adaptation, self-  
adapted  
adapting  
adaptive  
adaptiveness  
adaptivity  
adaptivity, model  
adaptivity, scenario  
adaptor  
adequacy  
adequacy, model  
adequate

adjustment  
adjustment, step-size  
administration  
administration, data  
administration, database  
administrator  
administrator, data  
administrator, database  
administrator, functional data  
admissibility  
admissible  
admissible space of models  
adopter, interoperation  
advance  
advance (v)  
advance, time  
advancement  
advancement, coordinated time  
advancement, independent time  
advancement, time  
advergame  
affinity  
affinity, model  
agenda  
agenda, game with  
agent  
agent, accreditation  
agent, anticipatory  
agent, autonomous  
agent, cognitive  
agent, deliberative  
agent, external  
agent, hybrid  
agent, intelligent  
agent, internal  
agent, itinerant  
agent, M&S executive  
agent, mediating  
agent, modeling  
agent, reactive  
agent, software

agent, task-oriented  
agent, validation  
agent, verification  
agent-to-agent  
aggregate (v)  
aggregation  
aggregation, data  
aggregation, level of  
aggregation, model  
aided  
aided, computer-  
aimed  
aimed, experience-  
aimed, experiment-  
aircraft  
aircraft, virtual  
algebraic  
algorithm  
algorithm, Adams-Moulton  
algorithm, analytic  
algorithm, back interpolation  
algorithm, backward Runge-Kutta  
algorithm, biologically-inspired  
algorithm, blended  
algorithm, check  
algorithm, conjugate gradient  
algorithm, control  
algorithm, cyclic  
algorithm, deterministic  
algorithm, discontinuity handling  
algorithm, distributed  
algorithm, evolutionary  
algorithm, evolutionary simulation  
algorithm, explicit  
algorithm, explicit first-order  
algorithm, explicit integration  
algorithm, faithfully stable integration  
algorithm, forward Euler  
algorithm, fully-implicit Runge-Kutta  
algorithm, fuzzy inference  
algorithm, genetic

algorithm, high-order  
algorithm, high-order Runge-Kutta  
algorithm, implicit integration  
algorithm, inlining implicit Runge-Kutta  
algorithm, integration  
algorithm, learning  
algorithm, matchmaking  
algorithm, model checking  
algorithm, modeling  
algorithm, monotonic evolutionary simulation  
algorithm, Monte Carlo  
algorithm, multi-step integration  
algorithm, nature-inspired  
algorithm, neuro-fuzzy inference  
algorithm, numerical integration  
algorithm, Nyström  
algorithm, optimistic simulation  
algorithm, ordinal optimization  
algorithm, Pantelides  
algorithm, relaxation  
algorithm, Runge-Kutta  
algorithm, scaled conjugate gradient  
algorithm, semi-analytic  
algorithm, semi-implicit  
algorithm, sequential  
algorithm, simplex  
algorithm, simulation  
algorithm, single-step  
algorithm, spectral  
algorithm, stable integration  
algorithm, step-size control  
algorithm, step-size controlled  
algorithm, stiff system integration  
algorithm, stiffly-stable  
algorithm, stiffly-stable implicit  
algorithm, symbolic  
algorithm, symbolic index reduction  
algorithm, Tarjan  
algorithm, tearing  
algorithm, time warp  
algorithm, variable-step integration

algorithm, verification  
aliasing  
allocate (v)  
allocated  
allocation  
allocation, component  
alternate  
alternate (v)  
alternative  
analog  
analogical  
analogous  
analogy  
analysis  
analysis, algorithm  
analysis, automatic theorem  
analysis, back-end  
analysis, behavior  
analysis, benchmarking  
analysis, boundary  
analysis, calling structure  
analysis, componential  
analysis, conceptual  
analysis, concurrent process  
analysis, constraint  
analysis, contextual  
analysis, control  
analysis, control flow  
analysis, correctness  
analysis, cross impact  
analysis, data  
analysis, data dependency  
analysis, data flow  
analysis, descriptive model  
analysis, dimension  
analysis, dimensional  
analysis, discriminatory  
analysis, domain  
analysis, dynamic error  
analysis, empirical  
analysis, error

analysis, error-correcting  
analysis, evaluative model  
analysis, ex-ante  
analysis, failure  
analysis, fault  
analysis, finite element  
analysis, front-end  
analysis, functional  
analysis, input-data  
analysis, input-output  
analysis, interface  
analysis, model  
analysis, model correctness  
analysis, model interface  
analysis, model-based  
analysis, multivariate  
analysis, mutation  
analysis, numerical  
analysis, output  
analysis, parameter sensitivity  
analysis, partition  
analysis, post game  
analysis, post run  
analysis, post simulation  
analysis, post study  
analysis, program  
analysis, requirement  
analysis, semantic  
analysis, sensitivity  
analysis, simulation  
analysis, simulation for system  
analysis, spectral  
analysis, state transition  
analysis, static  
analysis, statistical  
analysis, stochastic  
analysis, structural  
analysis, structure  
analysis, symbolic  
analysis, syntax  
analysis, system

analysis, time series  
analysis, training  
analysis, training task  
analysis, unbiased  
analysis, user interface  
analysis, what if  
analyst  
analytic  
analyzer  
analyzer, differential  
analyzer, digital differential  
ancestor  
angle  
angle, Euler  
animation  
animation, data  
animation, information  
animation, simulation  
animator  
annealing  
annealing, simulated  
anticipate (v)  
anticipated  
anticipation  
anticipation, behavioral  
anticipation, event  
anticipation, multiple  
anticipation, strong  
anticipation, weak  
anticipative  
anticipatory  
anticipatory, behaviorally  
antisymmetric  
antithetic  
aperiodic  
append (v)  
appended  
applet  
applicability  
applicability, frame  
applicability, frame-model

applicability, model  
applicability, range of  
applicability, scope of  
applicable  
application  
application, distributed  
application, domain  
application, domain of intended  
application, early  
application, event-driven  
application, general use M&S  
application, legacy  
application, M&S  
application, simulation  
application, simulation gaming  
application, web-enabled M&S  
approach  
approach, activity-scanning  
approach, component-based  
approach, control-theoretic  
approach, declarative  
approach, event history  
approach, event-scheduling  
approach, formal method  
approach, mixed symbolic and numerical  
approach, model-driven  
approach, model-driven development  
approach, mutation for model-driven  
approach, numerical  
approach, optimization  
approach, Pareto frontier  
approach, Pareto optimal  
approach, simulation-based design  
approach, simulative design  
approach, symbolic  
approach, system  
approach, system of systems  
appropriate  
appropriateness  
appropriateness, data  
appropriateness, model

- approximate
- approximate (v)
- approximation
- approximation, central difference
- approximation, finite difference
- approximation, finite element
- approximation, Padé
- approximation, polynomial
- approximation, quantization-based
- approximation, reliable
- approximation, remote entity
- approximator
- approximator, function
- approximator, universal function
- arc
- arc, inhibitory
- architecture
- architecture, cognitive
- architecture, cognitive modeling
- architecture, data
- architecture, distributed simulation
- architecture, dynamic software
- architecture, evolvable software
- architecture, executable
- architecture, federated simulation
- architecture, high level
- architecture, integrated
- architecture, M&S
- architecture, model-driven
- architecture, optimistic simulation
- architecture, reconfigurable software
- architecture, reference
- architecture, simulation
- architecture, simulation grid
- architecture, software
- architecture, system
- architecture, test and training enabling
- area
- area, functional
- area, functional domain
- area, subject

argument  
artificial  
aspect  
aspect, creative  
aspect, dormant  
aspect, latent  
aspect, redundant  
assert (v)  
assertion  
assertion, inductive  
assess (v)  
assessed  
assessing  
assessment  
assessment of decision maker's alternatives  
assessment, acceptability  
assessment, algorithm  
assessment, confidence  
assessment, data collection  
assessment, descriptive  
assessment, error  
assessment, ethical  
assessment, ethical goal  
assessment, input  
assessment, knowledge-based  
assessment, model  
assessment, model complexity  
assessment, morphological  
assessment, normative  
assessment, performance  
assessment, pragmatic  
assessment, qualitative  
assessment, qualitative algorithm  
assessment, quantitative  
assessment, quantitative algorithm  
assessment, risk  
assessment, semantic  
assessment, simulation error  
assessment, simulation model  
assessment, simulation software  
assessment, structural

assessment, structure  
assessment, syntactic  
assessment, system  
assessment, traceability  
assessment, validation  
assessment, verification  
assessor  
asset  
asset, reuse of simulation  
asset, simulation  
assignment  
assignment, causal  
assimilate (v)  
assimilation  
assisted, computer-  
association  
association, data  
association, gaming  
association, simulation  
assumed  
assumption  
assumption, explicit  
assumption, implicit  
assumption, justified  
assumption, Markov  
assumption, modeling  
assumption, simplifying  
assumption, unaccounted  
assumption, unjustified  
assurance  
assurance, built-in quality  
assurance, data quality  
assurance, model quality  
assurance, quality  
assurance, simulation quality  
asynchronous  
attach (v)  
attached  
attractor  
attractor, strange  
attribute

attribute, affected  
attribute, class  
attribute, composite  
attribute, conceptual  
attribute, data  
attribute, M&S  
attribute, model  
attribute, object  
attribute, owned  
attribute, physical  
attribute, reflected  
attribute, technological  
audit  
audit (v)  
audit policy  
audit trail  
auditory  
augmented  
augmented, semantically  
auralization  
authenticated  
authentication  
authentication, data  
authoritative  
authority  
authority, accreditation  
authority, certification  
automata  
automation  
automation, adaptive  
automaton  
automaton, bounded time domain  
automaton, cellular  
automaton, dynamic structure  
automaton, finite state  
automaton, hybrid  
automaton, timed  
automaton, timed input/output  
autonomous  
autonomy  
autoplastic

autopoiesis  
autopoietic  
autosimulation  
autosimulative  
auxiliary  
availability  
availability, data  
availability, service  
awareness  
awareness, HLA  
awareness, situation  
awareness, situational  
axiom  
axis  
axis, federation time  
axis, imaginary  
axis, logical time  
axis, real  
axis, time  
B--  
back up (v)  
background  
background, cultural  
backup  
backup, offsite  
backup, onsite  
backward  
band  
band, error  
bandwidth  
bank  
bank, model  
bar  
bar, causality  
base  
base, behavior data  
base, crisp rule  
base, experimental frame  
base, frame  
base, fuzzy rule  
base, knowledge

base, model  
base, parameter  
base, rule  
base, time  
based  
based, activity-  
based, agent-  
based, algorithm-  
based, bio-  
based, component-  
based, coupling-  
based, data-  
based, event-  
based, experience-  
based, experiment-  
based, frame-  
based, grammar-  
based, grid-  
based, I/O-  
based, knowledge-  
based, location-  
based, market-  
based, menu-  
based, methodology-  
based, model-  
based, mutation-  
based, object-  
based, ontology-  
based, participation-  
based, pattern-  
based, physics-  
based, plugin-  
based, port  
based, process  
based, quantization-  
based, region-  
based, rule-  
based, scenario-  
based, script-  
based, semantic-  
based, simulation-

based, specification-  
based, standard-  
based, state-  
based, synthetic environment-  
based, systems theory-  
based, theory-  
based, time-  
based, transaction-  
based, web-  
baselining  
basic  
basis  
battlefield  
battlefield, real  
battlefield, synthetic  
battlespace  
battlespace, joint synthetic  
battlespace, synthetic  
battlespace, virtual  
Bayesian  
before  
before, causal happens  
before, happens  
before, temporal happens  
behavior  
behavior, active  
behavior, adaptive  
behavior, anticipatory  
behavior, autonomous  
behavior, basic  
behavior, catastrophic  
behavior, comparison of  
behavior, complex  
behavior, constructive emotional  
behavior, counter intuitive  
behavior, crowd  
behavior, cyclic  
behavior, derived  
behavior, desired  
behavior, dynamic  
behavior, emergent

behavior, emerging  
behavior, emotional  
behavior, emulated  
behavior, entity  
behavior, ergodic  
behavior, erroneous  
behavior, expected  
behavior, fault  
behavior, faulty  
behavior, future  
behavior, generative  
behavior, group  
behavior, human  
behavior, inactive  
behavior, individual  
behavior, interactive  
behavior, involuntary emotional  
behavior, knowledgeable  
behavior, learned  
behavior, model  
behavior, model's  
behavior, non-ergodic  
behavior, normative  
behavior, observed  
behavior, organizational  
behavior, parasitic  
behavior, past  
behavior, periodic  
behavior, point  
behavior, predictable  
behavior, proactive  
behavior, public  
behavior, reactive  
behavior, repetitive  
behavior, simulated  
behavior, stable  
behavior, static  
behavior, steady  
behavior, structural  
behavior, symbiotic  
behavior, system

behavior, system's  
behavior, system's observed  
behavior, temporal  
behavior, trajectory  
behavior, transient  
behavior, unpredictable  
behavior, user  
behavioral  
benchmark  
benchmark (v)  
benchmarking  
benchmarking, model  
bias  
bias, experimentation  
bias, experimenter  
bifurcation  
bilinear  
bilinearization  
bimodal  
biosensor  
bisimilar  
bisimulation  
bisimulation, strong  
BOK (Body of Knowledge)  
bond graph  
bond graph, causal  
bound  
bound, error  
bound, global error  
bound, least upper  
bound, lower  
bound, upper  
boundary  
boundary, domain  
boundary, module  
boundary, system  
bounded  
bounded above  
bounded below  
bounded-output, bounded-input  
box

box, black  
box, glass  
box, gray  
box, white  
branched  
branched, simulation  
branching  
branching, simulation  
break (v)  
breaking  
breaking, tie  
broadcast  
broker  
brokering  
brokering, model  
brokering, simulation  
browsing  
bug  
building  
building, model  
built-in  
bundling  
burst  
burst, error  
business  
business, simulation  
C--  
calculate (v)  
calculated  
calculation  
calculation, ex-post  
calculus  
calculus, lambda  
calculus, predicate  
calibrate (v)  
calibrated  
calibrating  
calibration  
calibration, model  
calibration, parameter  
cancel (v)

cancellation  
cancelled  
capability  
capability, adaptive  
capability, interaction  
capability, interactive  
capability, simulation  
capability, simulation management  
capability, visualization  
capture  
capture, error  
career  
career, M&S practitioner  
catalogue  
category  
category, M&S  
causal  
causality  
causality, backwards time  
causality, computational  
causality, reverse time  
causality, two-directional  
causalization  
causalization, bond graph  
causalized  
causalized, partially  
cause  
cause-effect  
cell  
cell, non-standard  
cellular  
center  
center, data  
centric  
centric, net-  
centric, web-  
certain  
certainty  
certifiable  
certificate  
certificate (v)

certificate, compliance  
certificate, digital  
certificate, qualification  
certification  
certification, accreditation and  
certification, component  
certification, data  
certification, data producer  
certification, data verification, validation and  
certification, documentation of VV&T  
certification, model  
certification, model verification, validation and  
certification, professional  
certification, program  
certification, security  
certification, software  
certification, verification, validation and  
certified  
certify (v)  
chain  
chain, absorbing Markov  
chain, Markov  
chance  
chance, game of  
change  
change, alloplastic  
change, autoplatic  
change, conceptual  
change, continuous-  
change, design for  
change, designed for  
change, discrete-  
change, rate of  
change, state  
change, step  
change, structural  
changing  
changing, dynamically  
changing, state  
channel  
channel, input

channel, input-output  
channel, output  
character  
character, error  
characteristic  
characteristic, auditory  
characteristic, behavioral  
characteristic, data  
characteristic, internal  
characteristic, response  
characteristic, spatial  
characteristic, tactile  
characteristic, visual  
characterization  
characterization, model  
characterize (v)  
chart  
chart, Kiviat  
check  
check (v)  
check, algorithm  
check, algorithmic  
check, applicability  
check, completeness  
check, computerized applicability  
check, computerized completeness  
check, computerized consistency  
check, consistency  
check, dynamic  
check, dynamic program  
check, program  
check, static  
check, static program  
check, validation  
checked  
checker  
checker, consistency  
checking  
checking, assertion  
checking, consistency  
checking, desk

checking, documentation  
checking, error  
checking, integrity  
checking, model  
checkpoint  
chip  
chip, system on a  
circle  
circle, unit  
class  
class, agent  
class, component  
class, event  
class, fuzzy rule  
class, fuzzy rule base  
class, fuzzy set  
class, model  
class, object  
classification  
classification, epistemology-based  
classification, methodology-based  
classification, model  
classification, property  
classification, system  
clock  
clock, real-time  
clock, simulation  
closure  
cluster  
coarseness  
coarseness, model  
code  
code, classification  
code, compilable  
code, error  
code, error checking  
code, error correcting  
code, error detecting  
code, event  
code, experimental  
code, industrial classification

code, labor classification  
code, linkable  
code, object  
code, production  
code, simulation  
code, software  
code, source  
coefficient  
coefficient, error  
coercion  
coercion, simulation  
cognition  
cognition, source of  
cognitive  
coherence  
coherence, interaction  
cohesion  
collaboration  
collaboration, distributed  
collaboration, mobile  
collaboration, virtual  
collaborative  
collect (v)  
collecting  
collection  
collection, data  
collection, Internet-based data  
collector  
collector, data  
communication  
communication, bio-inspired  
communication, direct  
communication, indirect  
communication, stigmergic  
communicativeness  
community  
community, virtual  
co-modeling  
comparison  
comparison, behavioral  
comparison, behavioral model

comparison, cross model  
comparison, formalism  
comparison, graphical  
comparison, model  
comparison, policy  
comparison, structural  
comparison, structural model  
comparison, tolerance on  
comparison, trajectory  
compatibility  
compatibility, context  
compatibility, contextual  
compatibility, semantic  
compatible  
compatible, ALSP-  
compatible, DIS-  
compatible, HLA-  
compatible, software  
competition  
compile (v)  
compiler  
compiler, model  
complete  
complete, NP  
completeness  
completeness, algorithmic check of  
completeness, data  
complex  
complexity  
complexity, behavior  
complexity, behavioral  
complexity, cognitive  
complexity, computational  
complexity, encapsulated  
complexity, high cognitive  
complexity, high situational  
complexity, local  
complexity, low cognitive  
complexity, low situational  
complexity, problem  
complexity, simulation

complexity, situational  
complexity, structural  
complexity, system  
compliance  
compliance, HLA  
compliance, HLA  
compliance, certificate of  
compliant  
compliant, ALSP  
compliant, DIS  
compliant, HLA  
component  
component, active  
component, controllable  
component, cosimulation  
component, faulty  
component, federation  
component, goal  
component, high level  
component, interface  
component, large-grained  
component, low level  
component, meta-level  
component, modular  
component, passive  
component, reusable  
component, reusable simulation  
component, simulation  
component, software  
component, synthetic  
component, uncontrollable  
componential  
composability  
composability, dynamic  
composability, dynamic model  
composability, experimental frame  
composability, formal  
composability, model  
composability, plug-and-play  
composability, semantic  
composability, simulation

composability, syntactic  
composable  
composable, dynamically  
composant  
compose (v)  
composer  
composer, model  
composite  
composition  
composition, dynamic  
composition, dynamic simulation  
composition, federate  
composition, hierarchical model  
composition, knowledge-based dynamic simulation  
composition, model  
composition, program  
composition, runtime federate  
composition, semantics-based  
composition, simulation  
composition, software  
composition, valid  
comprehensibility  
comprehensibility, model  
comprehensibility, program  
compress (v)  
compressed  
compression  
compression, analytical data  
compression, data  
compression, model  
compression, speech  
compression, statistical data  
computability  
computable  
computation  
computation, evolutionary  
computation, post run  
computation, post study  
computational  
computer  
computer, analog

computer, digital  
computer, federate  
computer, high performance  
computer, host  
computer, host simulation  
computer, hybrid  
computer, object  
computer, simulation on high performance  
computer, virtual  
computer, virtual analog  
computerization  
computing  
computing, aesthetic  
computing, agent-based grid  
computing, autonomy-oriented  
computing, distributed  
computing, distributed and parallel  
computing, distributed high performance  
computing, grid  
computing, grid and cluster  
computing, high performance  
computing, numerical  
computing, optical  
computing, parallel  
computing, soft  
computing, symbolic  
concentration  
concentration, behavior  
concept

error, standard  
error, static

error, substitution  
error, syntactic  
error, syntactical  
error, syntax  
error, systematic  
error, transcription  
error, transmission  
error, trial and  
error, truncation  
error, type I  
error, type II  
error, type III  
error, type of  
error, typical  
error, unbiased  
error, uncorrelated  
error, unification  
error, user  
errorist  
estimate (v)  
estimated  
estimation  
estimation, density  
estimation, error  
estimation, parameter  
estimation, quality  
estimator  
estimator, biased  
estimator, unbiased  
ethical  
ethics  
ethics, simulation  
evaluate (v)  
evaluation  
evaluation, behavior  
evaluation, comprehensive  
evaluation, dependability  
evaluation, empirical  
evaluation, ethical  
evaluation, ex-ante  
evaluation, formal

evaluation, formal model  
evaluation, heuristic  
evaluation, lazy  
evaluation, lexical  
evaluation, model  
evaluation, partial  
evaluation, pragmatic  
evaluation, product  
evaluation, qualitative  
evaluation, quantitative  
evaluation, reliability  
evaluation, semantic  
evaluation, symbolic  
evaluation, syntactic  
evaluation, test and  
evaluation, testing and  
evaluation, training effectiveness  
evaluator  
evaluator, partial  
event  
event, alternative  
event, anticipated  
event, arrival  
event, conditional  
event, consumed  
event, critical  
event, current  
event, cyclic  
event, detected  
event, discrete  
event, endogenous  
event, exogenous  
event, explicit  
event, external  
event, following  
event, forced  
event, imminent  
event, implicit  
event, input  
event, internal  
event, lazy DEVS

event, next  
event, next external  
event, next internal  
event, optimistic  
event, perceived  
event, post-  
event, probabilistic  
event, rare  
event, scheduled  
event, scheduling an  
event, sentinel  
event, simultaneous  
event, split  
event, state  
event, state-dependent  
event, system  
event, time  
event, time-dependent  
event, time-stamp of an  
event, unessential state  
event, unimportant state  
event, unscheduled  
evolution  
evolution, lazy DEVS  
evolution, model  
evolution, scenario  
evolution, simulated  
evolvability  
evolvable  
exact  
exactness  
ex-ante  
exchange  
exchange (v)  
exchange, information  
exchange, rule-based information  
execute (v)  
execution  
execution, distributed  
execution, federation  
execution, model

execution, real-time  
execution, simulation  
execution, symbolic  
execution, tests  
executive  
executive, runtime  
exercise  
exercise, combined  
exercise, distributed  
exercise, simulation  
exogenous  
expansion  
expansion, parallel  
expansion, time-base  
experience  
experience (v)  
experience, location-based  
experience, real-life-like  
experience, role-based  
experience, sensory  
experience, virtual  
experienced  
experiencing  
experiential  
experientialism  
experientialist  
experientially  
experiment  
experiment (v)  
experiment, a priori  
experiment, computational  
experiment, computer-aided  
experiment, design of  
experiment, design of simulation  
experiment, deterministic  
experiment, digital  
experiment, empirical  
experiment, in silico  
experiment, in vitro  
experiment, in vivo  
experiment, large scale

experiment, model-based  
experiment, non-deterministic  
experiment, numerical  
experiment, participatory  
experiment, physical  
experiment, plausible  
experiment, simulation  
experiment, statistical  
experiment, thought  
experiment, virtual  
experimental  
experimental frame to a model, applicability of  
experimental frame, acceptability of  
experimental frame, applicability of  
experimental frame, applicable  
experimental frame, derivable  
experimental frame, multiple  
experimental frame, parameterized  
experimental frame, parametric  
experimental frame, realization of  
experimental frame, separation of model and  
experimentalism  
experimentalist  
experimentalize (v)  
experimentally  
experimentarian  
experimentation  
experimentation, capability engineering-based  
experimentation, computer-aided  
experimentation, designed  
experimentation, norms of  
experimentation, policy  
experimentation, real system  
experimentative  
experimentator  
experimented  
experimenter  
experimenting  
experimentist  
experiments  
experiments, statistical design of simulation

expert  
expert, domain  
expert, modeling  
expert, simulation  
expert, subject matter  
explain (v)  
explanation  
explanatory  
explicit  
ex-post  
exposure  
exposure, effects of simulation  
exposure, simulation  
expression  
expression, emotional  
expressiveness  
extensibility  
extensibility, formalism  
extensibility, runtime  
extensible  
extension  
extension, formalism  
F--  
facility  
facility, HLA-compliance certification  
facility, M&S  
facility, reconfiguration  
fact  
fact, anticipated  
fact, perceived  
fact, perceived external  
fact, perceived internal  
factors  
factors, human  
failure  
failure, detectable  
fallacious  
fallacy  
fallacy, deductive logical  
fallacy, logical  
false

false, completely  
false, degree of  
false, partially  
falsity  
family  
family, model  
fantasy  
fault  
fault, remaining  
faulty  
feasibility  
feasible  
feature  
feature, cultural  
feature, desirable  
feature, emergent  
feature, environmental  
feature, significant  
FEDEP  
federate  
federate, cloning of a  
federate, distributed  
federate, external cloning of a  
federate, multiresolution  
federate, runtime  
federate, simulation application  
federate, simulation output data analysis  
federate, simulation visualization  
federated  
federation  
federation, composable  
federation, computational  
federation, dynamically composable  
federation, extensible  
federation, grid  
federation, HLA  
federation, hyper  
federation, interoperable  
federation, M&S  
federation, model  
federation, national

federation, open  
federation, simulation  
federations, federation of  
feedback  
feedback, haptic  
feedback, state  
feedback, tactile  
fidelity  
fidelity, data  
fidelity, functional  
fidelity, M&S  
fidelity, model  
fidelity, physical  
fidelity, psychological  
fidelity, simulation  
field  
field, Hamiltonian  
field, potential  
field-of view  
fight  
fight, fair  
fight, train as you  
file  
file, event  
file, model  
file, object  
file, output  
filter  
filter (v)  
filter, cultural  
filter, dynamic personality  
filter, emotional  
filter, network  
filter, personality  
filtering  
filtering, data  
finite  
fire  
firing  
firing, transition-enabling  
firmware

first  
first, breadth  
first, depth  
fit  
fit (v)  
fitness  
fitness, simulation  
fitting  
fitting, model  
fitting, model behavior  
flag  
flag, error  
flag, event  
flaw  
flow  
flow, energy  
flow, entity  
flow, power  
flow, state  
flow, time  
following  
following, event  
forces  
forces, automated  
forces, computer-generated  
forces, intelligent  
forces, modular semi-automated  
forces, semi-automated  
forces, synthetic  
forces, synthetic-automated  
form  
form, block-lower-triangular  
form, canonical  
form, DEVS hierarchical  
form, hierarchical  
form, lower-triangular  
form, modular  
form, modular DEVS  
form, state-space  
formal  
formalism

formalism, adequacy of  
formalism, cellular automaton  
formalism, closure of  
formalism, common  
formalism, conceptual modeling  
formalism, DEVS  
formalism, discrete event  
formalism, dynamic modeling  
formalism, hierarchical structuring  
formalism, mixed  
formalism, model  
formalism, model building  
formalism, modeling  
formalism, multifaceted modeling  
formalism, multimodeling  
formalism, multisimulation  
formalism, multistage modeling  
formalism, next event  
formalism, specification  
formalism, static modeling  
formalism, timed  
formalism, tree  
formalism, untimed  
formalism, world view of a  
format  
format, big endian data  
format, canonical description  
format, data  
format, descriptive  
format, little endian data  
formation  
formula  
formula, central difference  
formula, explicit numerical integration  
formula, overimplicit numerical differentiation  
formula, semi-implicit trapezoidal  
formula, single-step  
formula, third-order overimplicit Adams  
formula, trapezoidal  
formulation  
formulation, problem

fragment  
fragment (v)  
fragmentation  
fragmentation, industry  
frame  
frame, base  
frame, experimental  
frame, observation  
framework  
framework, agent  
framework, application development  
framework, common  
framework, composable  
framework, distributed simulation  
framework, extensible  
framework, extensible M&S  
framework, generic agent  
framework, M&S  
framework, modeling  
framework, multimodel  
framework, object model  
framework, ontology-based  
framework, reusability  
framework, simulation  
freedom  
freedom, degree of  
freedom, simulation platform degree of  
freedom, six degree of  
frequency  
frequency, observed  
function  
function, ancillary  
function, asymmetrical  
function, common payoff  
function, confluent DEVS transition  
function, confluent transition  
function, cost  
function, cumulative distribution  
function, deterministic  
function, DEVS external transition  
function, DEVS global state transition

function, DEVS internal transition  
function, DEVS time advance  
function, discontinuous  
function, distribution  
function, dumping error  
function, error  
function, even  
function, external transition  
function, global state transition  
function, global transition  
function, hysteretic quantization  
function, internal transition  
function, local transition  
function, membership  
function, modeling  
function, multi-valued  
function, non-deterministic  
function, non-linear  
function, numeric  
function, objective  
function, odd  
function, payoff  
function, perceived payoff  
function, periodic  
function, probabilistic  
function, probability density  
function, probability distribution  
function, quantization  
function, response  
function, simulation response  
function, single-valued  
function, state transition  
function, step  
function, subnet membership  
function, symmetrical  
function, tie-breaking  
function, time advance  
function, transition  
function, translation  
function, zero-crossing  
functionality

functionality, common federation  
functionality, federation  
functionally  
fusion  
fusion, data  
fusion, sensor  
fuzzificate (v)  
fuzzificated  
fuzzification  
fuzzification, rule  
G--  
game  
game against nature  
game, abandonware

variable, independent state  
variable, initialization of state  
variable, initialized  
variable, input  
variable, instance  
variable, instantiated  
variable, instrumentable  
variable, instrumental

variable, instrumented  
variable, integer  
variable, integration  
variable, internal  
variable, interpolated  
variable, irrelevant  
variable, key  
variable, known  
variable, lag  
variable, lagged  
variable, latent  
variable, lead  
variable, level  
variable, linguistic  
variable, local  
variable, logical  
variable, meaning of a  
variable, measured  
variable, monitored  
variable, non-numerical  
variable, non-observable  
variable, numerical  
variable, observable  
variable, observational  
variable, observed  
variable, output  
variable, physical  
variable, preferred state  
variable, probabilistic  
variable, qualified  
variable, qualitative  
variable, quantified  
variable, quantitative  
variable, quantization of state  
variable, random  
variable, range of a  
variable, range set of a  
variable, rate  
variable, real  
variable, relevant  
variable, rotational

variable, run control  
variable, sensed  
variable, simple  
variable, single space  
variable, slack  
variable, spatial  
variable, stabilized  
variable, state  
variable, statistical  
variable, stochastic  
variable, subscripted  
variable, supplementary  
variable, surplus  
variable, system  
variable, tearing  
variable, temporal  
variable, temporary  
variable, through  
variable, time  
variable, trajectory of a  
variable, transition  
variable, translational  
variable, typed  
variable, uncontrollable  
variable, uninitialized  
variable, unknown  
variable, unqualified  
variable, yoked  
variance  
variance, analysis of  
variate  
variate, antithetic  
variate, random  
variation  
vector  
vector, criteria  
vector, input  
vector, state  
vector, state history  
veracity  
veracity, model

verifiability  
verifiable  
verification  
verification, black box  
verification, code  
verification, computer-aided model-  
verification, computerized model-  
verification, correctness  
verification, data  
verification, design  
verification, formal  
verification, functional  
verification, logical  
verification, model  
verification, model-based  
verification, program  
verified  
verifier  
verify (v)  
verisimilitude  
verisimilitude, model  
verity  
version  
version, reference  
view  
view, battlefield  
view, operational  
view, point of  
view, reductionist point of  
view, simulated  
view, system  
view, technical  
view, world  
viewer  
viewer, stealth  
virtual  
virtuality  
virtuality, augmented  
visualization  
visualization, battlefield  
visualization, data

visualization, execution  
visualization, immersive  
visualization, information  
visualization, interactive  
visualization, knowledge-based  
visualization, modeling, simulation and  
visualization, multi-dimensional data  
visualization, parallel  
visualization, real-time  
visualize (v)  
visualized  
vocabulary  
volatility  
volatility, feature  
volatility, implementation  
VV&A (Validation, Verification and Accreditation)  
VV&A, computer-aided  
VV&C, data  
VV&T (Verification, Validation and Testing)  
W--  
walkthrough  
war  
war, synthetic theater of  
war, theater of  
warez  
warfare  
warfare, information  
warfare, simulated  
wargame  
wargame, asymmetrical  
wargame, symmetrical  
wargaming  
wargaming, net-centric  
warm up  
warm up (v)  
warp  
warp, time  
web  
web, semantic  
width  
width, grid

width, hysteresis  
width, quantum  
word  
word, class  
word, prime  
world  
world, real  
world, simulated  
world, virtual  
wrap  
wrap (v)  
wrapping  
wrapping, model  
wrong  
Y--  
yoked
