

## 2nd International Symposium on Fuzzy and Rough Sets (ISFUROS 2017)

# Paper title

First Author, Second Author ...

## Abstract

Abstract must not exceed 250 words and be structured as follows: 1. short description of the problem being addressed; 2. the goals of the present study; 3. short description of the methods employed in this work; 4. results and discussion; 5. main conclusions drawn.

## Keywords

(No more than 6. Capitalize the first letter of each keyword. Separate the keywords with a semicolon).

## I. INTRODUCTION

Problem motivation. Literature review pertaining to the scope of the paper. Authors who deem it necessary may create sub-headings using hierarchy 1.1. The introduction must clearly motivate the problem being addressed and the goals behind the present work. The solution approach must be concisely described.

## II. METHODOLOGY

Describe the type of research, methods and techniques employed, including other aspects relevant to this study.

## III. RESULTS AND DISCUSSION

Outline the obtained results after explaining the techniques in the previous section. Tables and figures could be used to portray the results while avoiding repetitions. Highlight the novel aspects of the research and its superiority with respect to similar solutions. The analysis of the results must be in correspondence with the goals set for this study.

Tables and figures must be referenced in the text. Use proper captions for each and cite the source in case they are borrowed from another study.

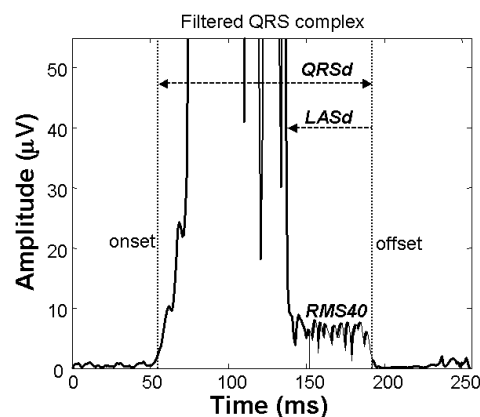

Figure 1. Figure caption is at the bottom, centered, using sequential numbering (Times New Roman 10 points).

#### IV. CONCLUSIONS

Conclusions must be drawn about the work presented in this paper. They must substantiate the facts and results obtained in the research study. Highlight the scientific contributions of this study and the potential for future work.

#### REFERENCES

Feel free to use the bibliography style of your choice. Harvard 8th edition or APA 6th edition are recommended. For more information please consult these links:
