CALL FOR PARTICIPATION

4th Int. MCETECH Conference on eTechnologies 4-6 May 2009, Ottawa, Canada

The Internet pervades many of the activities of modern societies and has become the preferred medium for the delivery of information and services. The successful implementation of Internet applications, ranging from eBusiness, to eEducation or to eGovernment, is a multi-faceted problem, involving technological, managerial, economic, and legal issues.

The **4th International MCETECH Conference on e-Technologies** aims to bring together researchers and practitioners interested in exploring the many facets of Internet applications and technologies. Contributions and presentations focus on original and inter-disciplinary approaches to these problems and combine technological aspects with economic, managerial, and organizational aspects.

This year's conference theme is **Innovation in an Open World**, and the program is composed of a keynote presentation, scientific paper presentations, a discussion panel, tutorials, workshops, and other related events. The conference also includes an industrial track, providing a forum for practitioners to present problems and case studies that have benefited from, or could benefit from, Internet technologies in their business.

E-Health Workshop and TIM Lecture Series (May 4)

Two associated events will run on the first days of the conference:

- E-health Workshop: Towards System Interoperability through Process Integration and Performance Management
- TIM Lecture Series of the Technology Innovation Management program at Carleton University

Tutorials (May 4-6)

For practitioners, eight very interesting tutorials presented by experts will run concurrently with the workshops and paper presentations:

- Understanding how RFID Technologies & EPC Network Enable Innovative e-Business Models: a BPR Approach (*Ygal Bendavid, École Polytechnique de Montréal*)
- Social Web, Web Architecture and the OpenSocial Standard (*Claude Coulombe, U. de Montréal*)
- Interoperability in Healthcare (*Norm Archer, McMaster University*)
- Open Source Software Licensing Best Practices in a Post Jacobsen v. Katzer World (*Thomas Prowse, Gowlings*)
- Putting Zotero to Work: Free and Open Source Research Management for You and Your Institution (*Trevor Owens, George Mason University*)
- User Requirements Notation for Business Processes (*Alireza Pourshahid, IBM and U. Ottawa*)
- Technology Innovation (*Andrew Fisher, Wesley Clover*)
- Securing Internet Applications - Why SSL is Not Enough (*Preeti Raman, Carleton U.*)

Scientific and Industrial Paper Sessions (May 5-6)

A total of 27 papers will be presented in eight sessions on:

- Inter-Organizational Processes (I and II)
- Internet-Based Collaborative Work / eEducation
- Service-Oriented Architecture
- Industrial Experience
- Open Source and Open Environments
- Short Research Contributions
- Security and Trust

Registration

Please visit <http://mcetech.org/> for registering to the conference, workshops and tutorials. Early rates are available until **April 15th, 2009**, but participants can still register afterwards (and even at the conference). However, please register early to help the organizers better plan the event.
