

## Instructions

On your computer, create a folder a0\_xxxxxxx, where xxxxxxx is your student number. Download the file [A0Q1.doc](#), and save it on your computer in the folder you created. Please read the contents of the file to see how the TAs will give feedback on assignments.

Create another Microsoft Word file, and write some text into the file. [You can write anything, but remember that the teaching assistants will be able to read what you write!] Save the file you created as A0Q2.doc, within your assignment folder, as if it was the answer to question 2 on assignment 0.

Upload the zip file as your assignment submission according to instructions in the lab manual.
