

# ITI1120 – Fall 2012 - Assignment 0

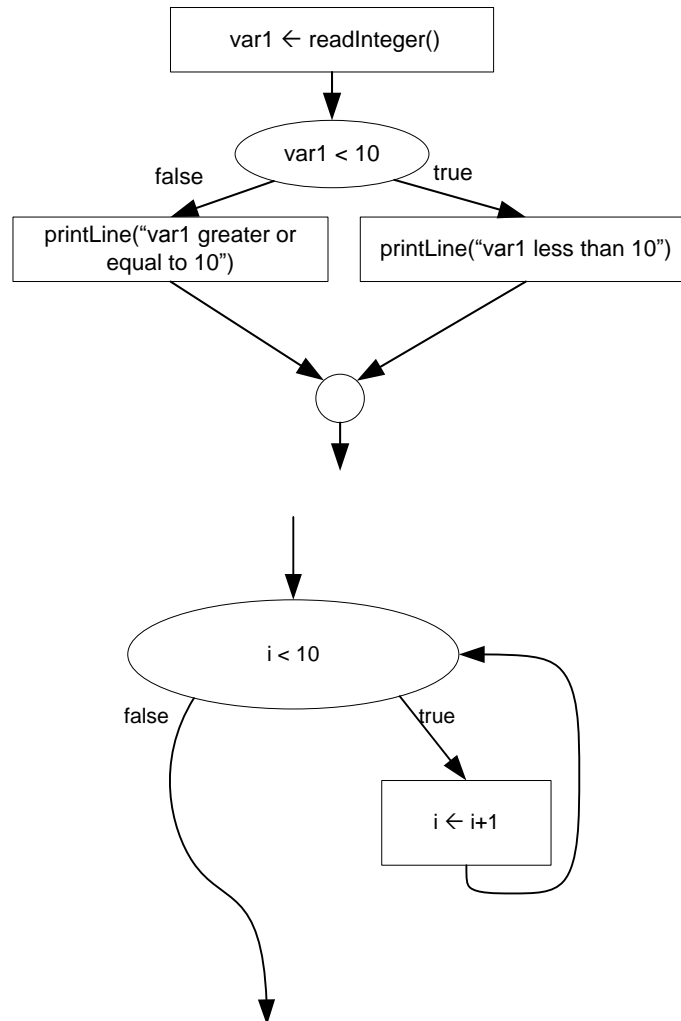

## 1. Instructions

This is a practice assignment that helps you understand how to submit your assignments using virtual campus. It will not be marked. Please note the followings:

- ❖ For question 1, create a file named A0Q1.doc containing a diagram drawn using Microsoft Visio.
- ❖ For question 2, copy the contents of the file Hello.java into the Word file A0Q2.doc (use `Courier new` font and font size 10).
- ❖ Writing the code in a Document file will help the TA to write notes about marking the assignment, and any other comments the TA wants to give to you.
- ❖ All the previous files should be placed in a folder A0\_xxxxxxx where xxxxxxx is your student number.
- ❖ Zip this folder to A0\_xxxxxxx.zip where xxxxxx is your student number. This zipped folder is the one that you will submit to virtual campus. For now, you can practice submitting the assignment; there is a submission link for that in virtual campus.

### Question 1

Draw the following two diagram using Microsoft Visio and then copy the diagram into the Word document (A0Q1.doc).

### Question 2

Compile and execute the program Hello.java using Dr Java. Afterward, create the Word document A0Q2.doc and insert the code of Hello.java in it (make sure you use Courier New font of size 10).
