

Chapter 15: CFG = PDA

I. Theory of Automata

→ II. Theory of Formal Languages

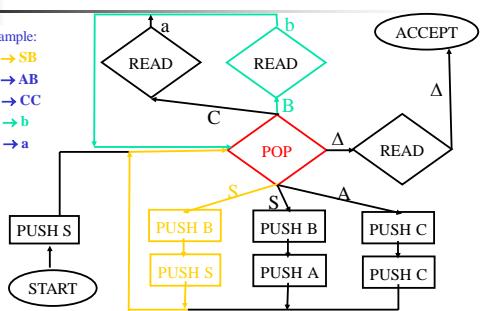

III. Theory of Turing Machines ...

- Theorem1. Given a CFG that generates the language L, there is a PDA that accepts the language L.
- Theorem2. Given a PDA that accepts the language L, there is a CFG that generates the language L.

Example:
 $S \rightarrow SB$
 $S \rightarrow AB$
 $A \rightarrow CC$
 $B \rightarrow b$
 $C \rightarrow a$

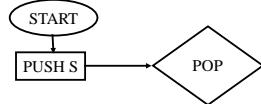

- Proof: by constructive algorithm
(CFG \rightarrow PDA)

- First, transform the grammar to one in Chomsky normal form. All productions are of the form:

$$\begin{aligned}X_i &\rightarrow X_j X_k \\X_i &\rightarrow x\end{aligned}$$

- Add

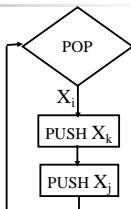

Dr. Nejib Zagula CSI3104-W11

4

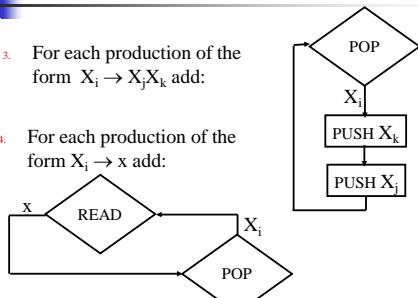

- For each production of the form $X_i \rightarrow X_j X_k$ add:

Dr. Nejib Zagula CSI3104-W11

5

- For each production of the form $X_i \rightarrow x$ add:

Dr. Nejib Zagula CSI3104-W11

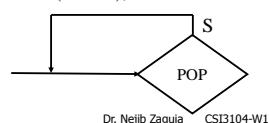

5

- Add:

- If $\Lambda \in L(S \rightarrow \Lambda)$, add:

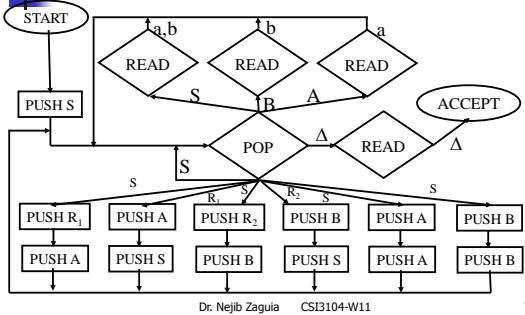

Dr. Nejib Zagula CSI3104-W11

6

$S \rightarrow AR1 | BR2 | AA | BB | a | b | \Delta$
 $A \rightarrow a \quad B \rightarrow b \quad R1 \rightarrow SA \quad R2 \rightarrow SB$

Dr. Nejib Zagua CSI3104-W11

7

Chapter 15: CFG = PDA

- **Theorem.** Given a PDA that accepts the language L, there is a CFG that generates the language L.
 - See the book for the proof

PDA and CFG are equivalent

Dr. Nejib Zagua CSI3104-W11
